Colonoscopy with MiraLAX Prep- SPLIT DOSE

Welcome to Gastro-Intestinal Consultants of Manhattan, P.A. Your doctor has recommended that you have a medical procedure called **colonoscopy**.

You will find the following items enclosed:

- Information Brochure “What is Colonoscopy?”
- Patient Information Brochure
- Colonoscopy Preparation Instructions
- Medical History Form
- Patient Registration Form

Please complete the enclosed forms prior to your appointment.

If you have any questions please call our office at 785-539-0156 or Toll Free 1-866-766-1166.

Our office will call you to schedule your appointment. In addition, we have a brief video about a colonoscopy on our website at www.giofmanhattan.com

Please bring your completed forms with you to your procedure. You will also have an opportunity to ask our staff any additional questions at that time. Even though you will receive a call from the hospital where your procedure is being performed, you still need to complete these forms and bring them with you.

Thank You

Gastro-Intestinal Consultants of Manhattan, P.A.

What is Colonoscopy?

Your doctor has recommended that you have a medical procedure called a colonoscopy to evaluate or treat your condition. This brochure will help you understand how a colonoscopy can benefit you and what you can expect before, during, and after this procedure.

What is a Colonoscopy?

The term "colonoscopy" means looking inside the colon. It is a procedure performed by a gastroenterologist, a well-trained subspecialist.

The colon, or large bowel, is the last portion of your digestive or GI tract. It starts at the cecum, which attaches to the end of the small intestine, and it ends at the rectum and anus. The colon is a hollow tube, about five feet long, and its main function is to store unabsorbed food products prior to their elimination.

The main instrument that is used to look inside the colon is the colonoscope, which is a long, thin, flexible tube with a tiny video camera and a light on the end. By adjusting the various controls on the colonoscope, the gastroenterologist can carefully guide the instrument in any direction to look at the inside of the colon. The high quality picture from the colonoscope is shown on a TV monitor, and gives a clear, detailed view.

Colonoscopy is more precise than an X-ray. This procedure also allows other instruments to be passed through the colonoscope. These may be used, for example, to painlessly remove a suspicious-looking growth or to take a biopsy - a small piece for further analysis. In this way, colonoscopy may help to avoid surgery or to better define what type of surgery may need to be done.

A shorter version of the colonoscope is called a sigmoidoscope, an instrument used to screen the lower part of the large bowel only. The colonoscope, however, is long enough to inspect all of the large bowel and even part of the small intestine.

Colonoscopy is a safe and effective way to evaluate problems such as blood loss, pain, and changes in bowel habits such as chronic diarrhea or abnormalities that may have first been detected by other tests. Colonoscopy can also identify and treat active bleeding from the bowel.

Colonoscopy is also an important way to check for colon cancer and to treat colon polyps - abnormal growths on the inside lining of the intestine. Polyps vary in size and shape and, while most are not cancerous, some may turn into cancer. However, it is not possible to tell just by looking at a polyp if it is malignant or potentially malignant. This is why colonoscopy is often used to remove polyps, a technique called a polypectomy.

How Do I Prepare for the Procedure?

There are important steps that you must take to prepare for the procedure. First, be prepared to give a complete list of all the medicines you are taking, as well as any allergies you have to drugs or other substances. Your medical team will also want to know if you have any other medical conditions that may need special attention before, during, or after the colonoscopy.

You will be given instructions in advance that will outline what you should and should not do in preparation for colonoscopy. **Be sure to read and follow these instructions.** One very critical step is to thoroughly clean out the colon, which, for many patients, can be the most trying part of the entire exam. It is essential that you complete this step carefully, because how well the bowel is emptied determines the success of the procedure. Be sure to follow instructions as directed.

You'll be asked to sign a form that gives your consent to the procedure and states that you understand what is involved. If there is anything you don't understand, ask for more information.

What Can You Expect During a Colonoscopy?

During the procedure, everything will be done to ensure your comfort. An intravenous, or IV, line will be inserted to give you medication to make you relaxed and drowsy. The drug will enable you to remain awake and cooperative, but it may prevent you from remembering much of the experience.

Once you are fully relaxed, your doctor will do a rectal exam with a gloved, lubricated finger; then the lubricated colonoscope will be gently inserted.

As the scope is slowly and carefully passed, you may feel as if you need to move your bowels, and because air is introduced to help advance the scope, you may feel some cramping or fullness. Generally, however, there is little or no discomfort.

Gastro-Intestinal Consultants of Manhattan, P.A.

What are the Possible Complications from a Colonoscopy?

Although colonoscopy is a safe procedure, complications can sometimes occur. These include perforation - a puncture of the colon walls, which could require surgical repair.

When polyp removal or biopsy is performed, hemorrhage (heavy bleeding) may result and sometimes require blood transfusion or reinsertion of the colonoscope to control the bleeding. Be sure to discuss any specific concerns you may have about the procedure with your doctor.

The time needed for colonoscopy will vary, but on the average, the procedure takes about 20 minutes. Afterwards, you'll be cared for in a recovery area until the effects of the medication have worn off. At this time, your doctor will inform you about the results of your colonoscopy and provide any additional information that you need to know. You'll also be given instructions about how soon you can eat and drink, plus other guidelines for resuming your normal routine.

What Can You Expect After Your Colonoscopy?

Occasionally, minor problems may persist, such as bloating, gas, or mild cramping. These symptoms should disappear in 24 hours or less. By the time you're ready to go home, you'll feel stronger and more alert. Nevertheless, rest for the remainder of the day. Have a family member or friend take you home.

A day or so after you're home, you might speak with a member of the colonoscopy team for follow-up, or you may have questions you want to ask the doctor directly.

Colonoscopy is an effective technique for evaluating and, in many cases, improving your digestive health.

How Colonoscopy Works.

The colonoscope is inserted in your anus and gently guided to the cecum, the first part of your digestive tract.

Upon reaching the colon, your doctor can guide the colonoscope to view the entire area.

Upon finding something suspicious, your doctor can take a biopsy.

....or do a polypectomy.

MiraLAX SPLIT DOSE Preparation Instructions for Colonoscopy

Date of Procedure _____ Time to Arrive at Hospital _____ Time of Procedure _____

Location of Procedure:

Mercy Regional Health Center at College
1823 College Avenue
Manhattan, KS 66502
785-776-3322

Manhattan Surgical Hospital
1829 College Avenue
Manhattan, KS 66502
785-776-5100

If you need to cancel or reschedule for any reason, please notify us at least 24-48 hours in advance.

1. You must purchase :
 - a.) One **bottle of MiraLAX** (238 gm)—this is available over the counter
 - b.) Four **Dulcolax tablets**—available over the counter at the drug store
 - c.) **TWO** 32 Ounce Bottles of **Gatorade (pick a flavor that is not red in color)**
2. Please arrive promptly for your appointment. We ask that you arrive one hour prior to your scheduled procedure time. This allows time for registration and the nurse to start an IV. Late arrivals may necessitate cancellation of your appointment.
3. Please take your medications with small sips of water on the day of your procedure.
4. Please bring a list of all your medications with you to your procedure.
5. Please notify my office in advance if you take Coumadin, Plavix, blood thinners, insulin, or chronic pain medications so that we can discuss dosing prior to your procedure.
6. Because you will be sedated, please bring a responsible person with you to your appointment so they can talk with me about your examination and any instructions for medications or further tests. This person must also drive you home after your test.

The Day Before Your Examination

You may eat a regular breakfast.

After 9:00 A.M. the day before your procedure you may have clear liquids only. The following are considered clear liquids: apple, grape, and cranberry juices; broth; coffee; Gatorade; hard candy; Jell-O; Koolaid; popsicles; soda pop; and tea. Do not have anything red colored.

To prevent soreness, you may want to apply Preparation H, Desitin, or Vaseline to the anus before beginning the prep and as needed.

At 4:00 P.M. take 4 Dulcolax tablets with 8 ounces of clear liquid.

Mix ½ of the MiraLax 238 gm bottle into each 32 ounce bottle of Gatorade and store in the refrigerator until needed

At 6:00 P.M. Begin drinking the Gatorade/MiraLax solution slowly Drink one 8 ounce glass every 15 minutes until gone. This will take about one hour. If you become nauseated, drink it slower. You may have clear liquids again until midnight.

Gastro-Intestinal Consultants of Manhattan, P.A.

The Day of Your Examination

IF Your Procedure is Scheduled Before Noon

At _____ A.M. (Four hours before your procedure time)

Drink the remaining 32 ounce bottle of Gatorade/MiraLax --Drink one 8 ounce glass every 15 minutes until gone.

You may take your morning medications with sips of clear liquids

Do **NOT** eat or drink anything in the 3 hours prior to your procedure.

IF Your Procedure is Scheduled After Noon

At 8 A.M.

Drink the remaining 32 ounce bottle of Gatorade/MiraLax --Drink one 8 ounce glass every 15 minutes until gone.

You may take your morning medications with sips of clear liquids

Do **NOT** eat or drink anything in the 3 hours prior to your procedure.

Please call if you have any questions or concerns about your procedure.
